Your DNA Your Say

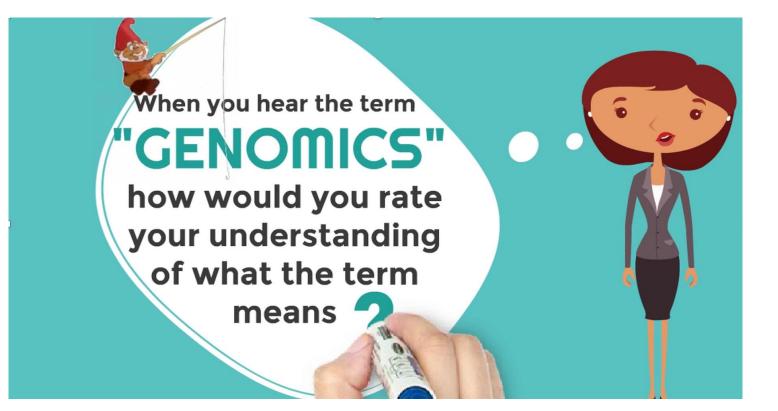

Dr Anna Middleton Head of Society and Ethics Research Connecting Science Cambridge, UK

WELLCOME GENOME CAMPUS

SOCIETY AND ETHICS RESEARCH

How to engage?

82% public unsure what a genome is

Inspire participation

Surveys need to be engaging (Wyse, 2013)

What are genomic databases being used for?

Data Access by Others

Recruitment

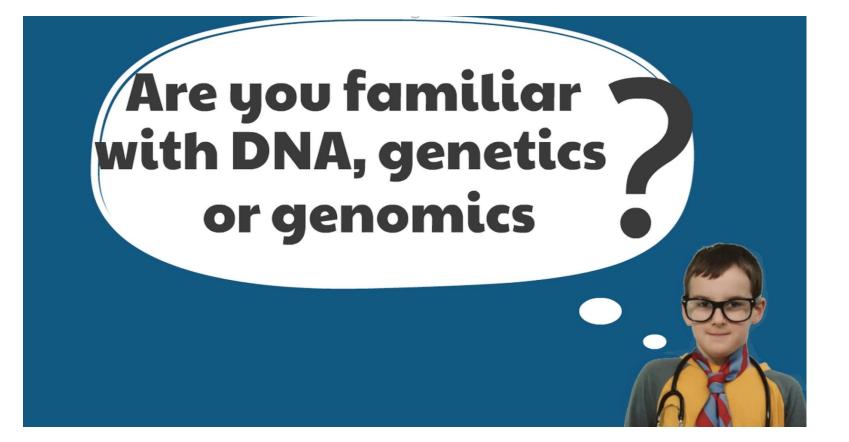

Survey participants recruited via a market research company,

Familiarity with genetics

Is DNA info different to other sorts of medical info?

Is DNA information different to other sorts of medical information

Should DNA data be handled differently to other sorts of data?

Which types of online data need the **GREATEST LEVEL** of protection against unauthorised use

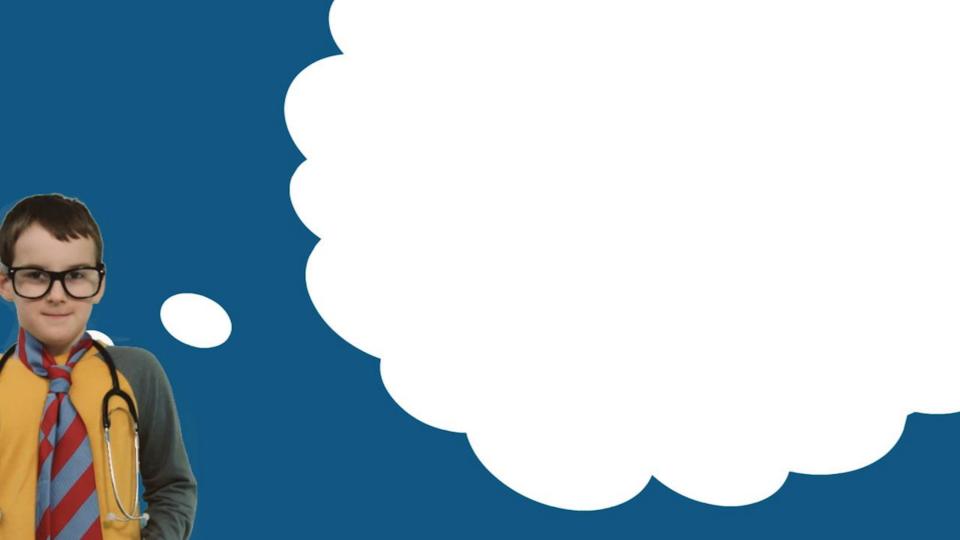

Concern about pharma making profits from free donation

Those who are familiar with genomics are more likely to donate Perceived harms

...if someone linked your DNA information to your name

Key Messages

Engage, raise awareness about:

- DNA, genetics and genomics
- The difference between DNA and other medical information
- The purpose and value of DNA donation and sharing
- The protections in place against exploitation
- Articulate the fears people have (it is unlikely to affect whether they will donate or not and it provides a chance to clear up misunderstandings)

It couldn't have happened without.....
